EDUCATION

Bulacan State University

2022 - 2026

Bachelor of Science in Information Technology

Latin Honors: Cum Laude

SKILLS

Languages: HTML5, CSS3, JavaScript, TypeScript, C#, C++, Java, Python

Frameworks: React, Vite, Next.js, Tailwind CSS, Bootstrap, Node.js, Django

APIs & Databases: REST, MSSQL, MySQL, PostgreSQL, MongoDB, Firebase

Artificial Intelligence: LangChain, RAG, Generative AI, OpenAI, Gemini, ChatGPT

Tools: Git, GitHub, Figma, Postman, Selenium, Visual Studio Code, Android Studio

EXPERIENCE

Web Development Intern

Dec 2025 - Mar 2026

8box Solutions Inc.

- Contributed to 3 web applications by developing React frontend components and backend APIs with Node.js and MySQL.
- Built 15+ reusable components and integrated 10+ REST APIs, improving code reusability and development efficiency.
- Resolved issues across 10+ backend API endpoints and assisted with cPanel deployments to support production releases.
- Tested 20+ API endpoints using Postman, identifying and reporting issues throughout development to ensure reliable APIs.

PROJECTS

Gabay AI

2026

TypeScript | React | Node.js | Gemini | MongoDB

- Developed an AI text summarizer using the Gemini API, supporting 10,000 - character inputs across 4 summary modes.
- Built an AI flashcard generation pipeline, converting PDF, DOCX, and TXT files up to 5 MB into study-ready flashcards

SDPTSolutions Academy

2025

TypeScript | React | Next.js | Bootstrap | OpenAI | Firebase

- Built a Retrieval-Augmented Generation chatbot using LangChain and OpenAI to answer user queries from course content.
- Designed and implemented 20+ RESTful API endpoints supporting course management, progress tracking, and payments.
- Executed API testing using Postman and REST Client, running 50+ test cases to validate functionality and error handling.

Custom Survey & Analytics Platform

2025

TypeScript | React | Tailwind CSS | Django | PostgreSQL

- Implemented a drag-and-drop survey builder, reducing setup time from approximately 5 minutes to 3 minutes during testing.
- Integrated 10+ charts and visualizations into the dashboard, enabling faster data analysis and improving user experience.

Enrollment System

2023

Java | Microsoft SQL Server

- Enhanced student enrollment processing, cutting processing time in half compared to the traditional paper-based process.
- Developed a system for managing enrollment and records, generating reports, and reducing administrative processing time.
- Enabled data-driven decisions by implementing structured reporting and improving overall data management processes.

CERTIFICATIONS

Salesforce Supported Virtual Internship Program 2025 - Certificate of Completion
